GOST-R certification

Gain access to the Russian market.

Your challenges

Many companies in Europe are experiencing difficulties in their domestic markets and are looking abroad for new markets with high potential. As the fastest growing export market and the third largest after Europe and North America, Russia is a country with many opportunities for foreign companies. The Russian Federation has made many market reforms in recent years, with a strategy focussed on modernising the country's financial system and developing its market infrastructure. Because of this, it is important to ensure that your products meet the stringent national safety regulations and standards necessary to trade in Russia.

What is GOST-R?

GOST-R certification demonstrates that your products meet the regulations and standards for customs clearance and trading in Russia. Today, there are nearly 18 applicable certification and/or declaration schemes in the Russian Federation. Some of these schemes are mandatory and necessary for legal compliance, selling and usage.

Why is GOST-R certification important for your business?

GOST-R certification is a mandatory requirement for almost all consumer products and industrial equipment.

How can you prepare for GOST-R certification?

You will need to prepare the following documents:

- Application form
- Power of attorney from the manufacturer
- Details of the producer (manufacturer)
- Description of the technical device (the external appearance, specifications, area of use)
- Technical documentation:
 - Passports of technical devices, user manuals
 - Product design drawings with specific elements of the material
 - Instructions on assembly, use on assembly
 - Protocols of factory testing
- ISO 9001 certificate

How can we help you?

TÜV SÜD is familiar with all requirements for the Russian market. Whatever sector you operate in, we offer comprehensive and qualified support and provide actual information regarding certification of your products in accordance with Russian regulations and standards. Our experts partner you throughout every phase with a solution tailored exactly to your needs.

Our GOST-R services
